Prof. Razia Korejo, Vice President
Dr. Haleema Yasmin, General Secretary
Dr. Shahina Zahoor, Treasurer

Dear Colleagues,

Cervical Cancer is the second common cancer amongst Pakistani women, consuming the lives of 20 women every day who die due to this disease. (Source: WHO, United Nations, the World Bank, IARC Globocan). It is mostly diagnosed at a late stage in Pakistan.

To address this issue of rising mortality of women in Pakistan, Association of Mothers and new born (AMAN) & Society of Obstetrics & Gynecology, Pakistan (SOGP) is organizing an awareness seminar about causes and preventive strategies of Cervical Cancer on 30th of January 2016 at Najam Uddin Auditorium JPMC Karachi from 12- 02:00 pm. January is the Cervical Cancer awareness month worldwide.

The objective is to enhance the already launched platform of UACC (United Against Cervical Cancer) Teal Ribbon Alliance in Pakistan, thereby increasing awareness for Cervical Cancer & establish the need for prevention & screening in Pakistan.

We would like to invite you to participate in this event and support us in prevention & early detection of Cervical Cancer in Pakistan.

The women of Pakistan are unaware of the seriousness of this disease. It's high time we all should **Unite Against Cervical Cancer** to protect our girls & women from this silent killer!

"We are **United Against Cervical Cancer**"

Dr Shahida Zaidi
President AMAN
